The Genuine Advantage

Standard Life Plus Thermo King Alternators

452592, 452593, 452594, 452597

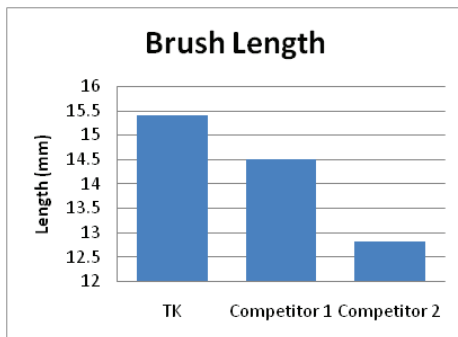

Standard Life Plus Thermo King Alternators

Benefits include:

- **Warranty Coverage** – Protection you can count on with Nationwide Dealer Warranty Protection – 18 month parts warranty
- **High-End Components** – Shares all critical components with the Thermo King Extended Life OE alternator
- **Proven Reliability** – Thermo King alternators are engineered by Thermo King and extensively tested for optimum performance and reliability under extreme conditions
- **Best Value** – Thermo King Standard Life Plus alternators are brand new for increased life over remanufactured and are available at a competitive price for the best value in the market

Thermo King Edge: Superior Brush Design

- Thermo King alternator brushes were the longest of any tested with a 15.4 mm length
- Thermo King alternator brushes are pre-worn to allow for a smooth fit with the slip ring, which results in consistent wear of the brushes and maximum life
- Thermo King alternators use bronze brushes and slip rings for increased life

Superior Brush Design = Longer Life = Reduced Maintenance Costs

Thermo King Edge: Robust Painting and Varnishing Process

Competition

Thermo King

Thermo King alternators operate in diesel environments and the paint and varnish processes are critical to ensure the alternators have a long life. All critical components (except clear-coated housing) are painted and varnished to reduce the risk of corrosion and electrical shorting.

All new Thermo King alternators go through a rigorous 700-hr. salt spray test to ensure long life in demanding applications.

Robust Painting Process = Reduced Risk of Failures = Increased Unit Uptime

Thermo King Edge: Unique Regulator Design

Exposed Electrical Contacts

Competition

Thermo King

Thermo King alternators utilize a proprietary temperature compensated regulator designed specifically for our units. The regulators are completely sealed to prevent against moisture ingress and corrosion and also utilize an integrated capacitor.

Most competitive regulators use an external capacitor which is another potential failure point. Thermo King Standard Life Plus alternators also use a regulator design that will work with all older units, regardless of software version.

Superior Regulator Design = Reduced Risk of Failures = Increased Unit Uptime and Performance

Compare for yourself the Genuine Advantage

Alternators are critical to the function of your refrigeration unit. **An over-the road alternator failure costs \$550 on average** and often requires the replacement of the battery as well. Be sure you have an OEM tested and approved alternator on your unit!

Also Available:

Thermo King Extended Life OE and Remanufactured Alternators - choose the alternator that best suits your needs!

Reman

- Not just rebuilt; totally remanufactured
- All alternators are completely disassembled and cleaned, and all worn parts are replaced
- 1-year parts warranty

Extended Life OE

- Delivers the same performance and life as factory-new Thermo King components
- Maximum corrosion resistance with epoxy powder coat paint and stainless steel hardware
- 2-year parts warranty
